

# STEEL FIBERS

Our high strength steel fibers are filaments with hook ends used as reinforcing steel in concrete structures such as industrial floor and pavements, shotcrete, and precast elements.

WE ARE A PROUD MEMBER OF

## APPLICATIONS

- Pre-cast structures • Shotcrete • Industrial floors
- Concrete slabs • Seamless floors

## FEATURES

- Cold drawn low carbon wire.
- Straight with hooks at the ends (hook end).

## ADVANTAGES

- Better cracking control.
- Greater resistance to impact.
- Technical advice for fibers classification according to each project.
- Reduce labor and material costs.

## MEETS

ASTM A-820, ISO-13270, EN 14889-1.

BUILDING AND SECURING YOUR FUTURE

# STEEL FIBERS

Made of low carbon wire, our steel fibers has polished and bright finish. It's length and diameter will depend on the required application.

## MODEL L33-55

LENGTH L	DIAMETER d	ASPECT RATIO	PERFORMANCE
mm	mm	L/d	fibers/kg
33.0	0.55	60	16,100

## MODEL L33-75

LENGTH L	DIAMETER d	ASPECT RATIO	PERFORMANCE
mm	mm	L/d	fibers/kg
33.0	0.75	44	8,600

## MODEL P50-75

LENGTH L	DIAMETER d	ASPECT RATIO	PERFORMANCE
mm	mm	L/d	fibers/kg
50.0	0.75	67	5,700

## MODEL P50-100

LENGTH L	DIAMETER d	ASPECT RATIO	PERFORMANCE
mm	mm	L/d	fibers/kg
50.0	1.00	50	3,200

## PACKAGING

20 KG Boxes or 20 KG Bags

1,200 kg Polypropylene Bags

## FIBER SPECIFICATIONS

Tensile Strength 151 - 176 ksi

Breaking Strength 15,100 kg/cm<sup>2</sup>

WE SERVE THE CONSTRUCTION MARKET WITH A BROAD MIX OF SUPERIOR PRODUCTS AND STEEL SOLUTIONS.
